Post and Telecommunications Institute of Technology (PTIT)

TECHNICAL SKILL

- **AI/ML:** Deep Reinforcement Learning (DQN), YOLOv8, CNN (ResNet-50), SVM, Model Training
- **Frontend:** ReactJS, Next.js (SSR/CSR), TypeScript, HTML5, CSS3, JavaScript (ES6+), Responsive Design
- **Software Development:** Java (Spring Boot), Python (Flask, TensorFlow), C++, SQL
- **Infrastructure:** AWS (EC2, ECS), Docker, Git/GitHub, Linux Administration
- **Software Process:** Agile/Scrum, SDLC, User Stories, Use Case Diagrams, System Documentation
- **Networking & IoT:** Cisco Network Configuration, Fire Alarm IoT Systems

TECHNICAL PROJECTS

- **Find Anyone Online** Oct 2024 - Feb 2025
Spring Boot & CNN [Github](#)
 - Developed a face detection system using **CNN - FaceNet** and high-dimensional feature vectors.
 - Developed system using **Spring Boot + ReactJS** Deploy using **Docker** implement **Model ML** for intelligent feature.
 - **Achievement:** Successfully optimized model for real-time facial recognition.
- **Mask Detection & Warning System** Sep 2025 - Oct 2025
ResNet-50 & SVM [Github](#)
 - Trained a detection model using **ResNet-50** for feature extraction and **SVM** for classification.
 - Containerized the application with **Docker** and deployed on **AWS EC2**.
 - **Achievement:** Scalable real-time warning system with robust feature-based classification.
- **Traffic Light Control AI Agent** Jan 2026 - Present
Deep Reinforcement Learning & YOLOv8 [Github](#)
 - Implemented a **Deep Q-Network (DQN)** model for adaptive traffic signal control.
 - Utilized **YOLOv8** for vehicle counting and real-time traffic density estimation.
 - **Achievement:** Enhanced simulated traffic flow efficiency through intelligent agent-based decision making.
- **Gold Decor Website** May 2025 - Jun 2025
Commercial Production Project [Website](#)
 - Performed full SDLC: Collected business requirements from client and designed technical specifications.
 - Developed a high-performance frontend using **Vite.js** and React for optimized build times.
 - Managed domain procurement and configured DNS through **Cloudflare Tunnel** for secure access.
 - Provisioned and managed a **VPS** to host the application via Cloudflare's secure tunneling technology.
 - **Achievement:** Successfully launched a secure, live commercial website with zero open ports on the VPS.
- **IDS-KAFKA-RANDOMFOREST** Feb 2025 - Apr 2025
Network Security & Big Data [Github](#)
 - Integrated **Zeek**, **Kafka** and **Random Forest** for real-time network threat detection.
 - **Achievement:** Real-time system operating monitor for network security.
- **IoT Fire Alarm System** 2025
IoT & Arduino
 - Configured hardware sensors with cloud alerts for fire prevention.
 - **Achievement:** Reliable real-time warning system deployed in a lab environment.
- **Break Out Ball Game** Aug 2024 - Oct 2024
Java OOP Project [Github](#)
 - Implemented core game logic using **Java Swing** and **OOP** principles.
 - **Achievement:** Secured an A+ grade in the Object-Oriented Programming module.

PROFESSIONAL SUMMARY

Senior IT student at PTIT with deep interest in AI and Full-stack development. Experienced in leading research teams and deploying AI models on cloud infrastructure. Proven record of academic excellence with multiple A-grade technical courses.

EDUCATION

Degree	Institute	GPA	Year
B.E. in IT	Post and Telecommunications Institute of Technology	3.0/4.0	2022 - 2027

- **Academic Results:** C++ (4.0), Java (4.0), OOP (3.7), Python (3.0).

RESEARCH EXPERIENCE

- **Scientific Research: Apartment Management** Sep 2023 - Sep 2024
Team Leader
 - Led the team in designing SQL Server databases and Spring Boot MVC architecture.
 - **Achievement:** Final project presentation score of 82/100.
- **Break Out Ball Game** Aug 2024 - Oct 2024
OOP Project GitHub
 - Implemented core OOP principles in Java focusing on FPS and collision logic.
 - **Achievement:** Received an A+ grade in Object-Oriented Programming.

INFRASTRUCTURE & CERTIFICATIONS

- **IoT Fire Alarm System** 2025
Embedded Development
 - Developed a real-time warning system integrating sensors with cloud alerts.
 - **Achievement:** Reliable fire detection prototype with real-time notifications.
- **Cisco Networking**, Knowledge of network configuration and Cisco IOS 2025
- **TOEIC 600 Target**, Studying for official certification Expected 2026
