

NGO QUANG MINH

Software Engineer
+84 384 194 364 | quangminh.it.59@gmail.com
github.com/MinhKhongCau | linkedin.com/in/quang-minh-ngo
Posts and Telecommunications Institute of Technology (PTIT)

Technical Skills

- **Backend**: +**NestJS**, Java 21 (Spring Boot), Python, Node.js
- **Frontend**: +**ReactJS**, Vite, TypeScript, Tailwind CSS, +**TanStack Query**, Zustand
- **Architecture & Messaging**: +**Microservices**, REST API, Kong API Gateway, +**RabbitMQ**, WebRTC, Socket.IO
- **Databases & Caching**: PostgreSQL, Redis, My SQL
- **DevOps, Cloud & Infra**: +**Docker**, +**CI/CD**, +**Linux**, +**VPS Management**, +**AWS** (EC2/ECS, S3), +**Cloudflare Tunnel**, +**Git Workflow**, **Nginx** reverse proxy
- **Machine Learning**: **YOLO**, +**CNN** (FaceNet), ResNet-50, Gemini API
- **AI Skill**: **Claude Code**, Intergrate **MCP**, **SKILL**
- **Git Skill**: **Commit**, Merge **Rebase**, **Fix conflix**, Git workflow, Action, Runner, Ssh Key-based Authentication

Work Experience

- **Full-Stack - MEKONG CO., LTD - 6 Month** *01/2026 – 09/2026*
  Full-Stack Developer Intern Trend Coffee | The terminal
  – Co-developed and operated production web platforms for an F&B (Order, customer service, warehouse) chain, serving daily operations.
  – Engineered scalable backend RESTful APIs using **NestJS**, implemented **Redis** caching for high-frequency campaign queries, and integrated **Firebase Cloud Messaging (FCM)** for real-time marketing push notifications.
  – Built dynamic frontend interfaces with **ReactJS, TypeScript, and TanStack Query**, for strengthen **Availability** and **Usability**
  – Boosted system performance and security using **Nginx** as a reverse proxy and maintain centralize SSL
  – Maintained staging and production deployments on **Linux VPS** environments using **Docker Compose**, **Hub** and automated **GitHub Actions CI/CD** pipelines.
  – Monitored server health, memory/disk thresholds, and service uptimes; diagnosed system bottlenecks through access and error logs to maintain service availability.
  – **Impact:** Processed over 9k request per day and process high transaction volume across in peak hour.
  – **Result**: Arract **700+ new active users** within the first 3 months of launch.

Featured Projects

- **MindCare – Psychological Counseling Platform** *01/2026 – 04/2026*
  Microservices, AI & WebRTC Demo | API Docs | Observer
  – Architected a polyglot microservices system (**Java, Go, Python, Node.js**) routed through **Kong API Gateway**, developing a custom Go plugin for centralized JWT validation, RBAC, and strict internal route isolation (`/internal/*`).
  – Implemented **M2M Authentication** with asymmetric RSA token issuance and established asynchronous communication using **RabbitMQ** (Topic Exchanges, Persistent Queues).
  – Built a fault-tolerant payment flow using the **Transactional Outbox Pattern** with Exponential Backoff Retries to handle **VNPay** IPN webhooks and synchronize booking states.
  – Integrated AI psychological screening via **Google Gemini API** and built an emotional support chatbot using local embeddings with **Ollama** and **PostgreSQL PGVector** for semantic retrieval.
  – Engineered real-time messaging (**Socket.IO, Redis**) and 1-on-1 peer-to-peer audio calling with **WebRTC**.
  – **DevOps & Infra:** Containerized all 8+ backend services using multi-stage **Dockerfiles**, orchestrated deployment on a **Linux VPS** with **Docker Compose**, and configured secure ingress via **Cloudflare Tunnel**.

- **Find Anyone Online** *10/2024 – 02/2025*
  Spring Boot & FaceNet Vector Search Github
  – Engineered a facial recognition pipeline utilizing **FaceNet (CNN)** embeddings and high-dimensional vector search.
  – Containerized the deep learning pipeline with **Docker** and integrated with a **Spring Boot** backend and **ReactJS** frontend.

Education & Certifications

- **Posts and Telecommunications Institute of Technology (PTIT)** *2022 – 2027*
  B.E. in Information Technology (GPA: 3.0/4.0)
  – Relevant Coursework: C++ Programming (4.0), Java Programming (4.0), Object-Oriented Programming (3.7).
  – Scientific Research: Apartment Building Fee Management System – Scored 82/100 defense.

- **Cisco Certified Network Associate (CCNA Curriculum)**, Network Topology Design & Cisco IOS Configuration *2025*
- **Languages & Methodologies**, English (TOEIC 600+), Agile/Scrum, Git Flow (Branching, PRs, Code Reviews), CI/CD Automation*2026*
